

Trees Please

Planting or adopting a tree is a very special and meaningful way to express sympathy. The thought of a young tree being planted in memory of a lost friend or family member can be comforting. But to know that your tree will gradually take its place in a natural forest, provide life-sustaining benefits for the people of the area and do it all for up to 80 years, well that's more than comforting, it is visionary.

Thank you for considering a memorial tree.

Memorial Trees in the Rideau Valley

...an experienced, local
tree planting service
for families and groups.

Memorial Tree Program

Trees Help People Cope . . .

The idea of peaceful natural areas, forest walks and lots of lovely mature trees help people cope with the pace of modern life and with difficult family times.

At times of loss, the stability of living trees gives peace to the family and long-lasting satisfaction to the many people who will enjoy and care for the trees in the decades to come. Knowing that trees will go on giving clean water, clean air, improved soil, wildlife habitat and huge amounts of peace and quiet for the next 80 years is rather comforting too...a legacy to the family and the community.

The Rideau Valley Conservation Foundation offers a Memorial Tree Program in memory of departed loved ones or friends. We can plant seedlings on your behalf which will gradually take their place, without inscription, in a vibrant new forest of the future. Or, you can adopt a mature tree with an inscription, a landmark where the family can visit, remember and enjoy the serenity of a wooded parkland at your leisure. Details are on the next panel.

We plant and tend combinations of white cedar, white pine, red oak and sugar maple — all strong, long-lived native Canadian species that thrive in our local Rideau Valley landscape.

To make a gift of trees, please fill out the information on this card, put it in the prepaid envelope provided and drop in the nearest mailbox. We will take care of the rest.

Best wishes to you and the family...
