

RIDEAU VALLEY CONSERVATION FOUNDATION NEWS RELEASE

RAIN BARRELS IN RIVERSIDE SOUTH, GOOD FOR YOU, THE KIDS AND THE COMMUNITY

April 14, 2014, Community Service Announcement

Rain barrels ...

- store and distribute clean, chemical-free water at no cost
- reduce erosion and pollution in local streams
- reduce runoff from your property keeping more rainwater in your garden
- promote infiltration of water into the ground to replenish groundwater supplies
- decrease your water bill if your drinking water is metered.

It only makes sense to save and use what Mother Nature gives us rather than making the expensive municipal drinking water system or your private well work hard to produce water for gardening.

Cheapest barrels in town; more family protection against climate change; free, clean water whenever you want it; lower water bills; fully-equipped and ready to go; cleaner streams; a better environment for your kids: do you need any more reasons than that?

Inexpensive, recycled rain barrels now available for order online through the Riverside South Community Association and the Rideau Valley Conservation Foundation. Visit the secure website <http://rainbarrel.ca/riversidesouthconservation> to order for guaranteed delivery. Pickup is on Saturday, May 31 at Claudette Cain Park on River Road near Earl Armstrong.

There is no better chance than this to get that barrel you've always wanted ... good for you, good for the kids, good for the community. Everyone welcome.
