

Gifts of Planted Trees Are Very Special

Planting or adopting a tree is a very special, different and exceedingly durable way to mark the big and little milestones of life or as special gifts for people who enjoy the outdoors.

The thought of a young tree being planted and cared for to celebrate your birthday creates a very comforting link between the donor, the recipient and the environment. Knowing, in addition, that your tree will gradually take its place in a natural forest and provide life-sustaining benefits to the people of the area for up to 80 years, well, that's more than comforting, it's a lovely thoughtful community-minded gesture.

Surprise someone soon with a gift of healthy, local, living trees. The whole community will thank you.

Thanks for considering special occasion trees.

Special Occasion Trees in the Rideau Valley

Families and Trees

Special occasions call for special effects! Did you ever consider making a very special, very festive and very important statement by planting or adopting a living tree for a special family occasion?

Most of life's big and little family events such as births, birthdays, weddings, graduations and anniversaries of all kinds become extra special when commemorated with living trees.

A gift of living trees provides long-lasting satisfaction and a sense of connection to the past for the recipient and for the many people who will admire and enjoy the growing trees in the decades to come. Trees also provide huge environmental benefits to the entire area. Trees are little environmental cleaning stations that give us clean air, clean water, better soil, wildlife habitat, soothing vistas and huge amounts of plain old peace and quiet.

We would be honoured to plant one or more trees on your behalf right here at home in the Rideau Valley for an upcoming special family occasion. One for each grandchild each birthday perhaps? A small grove for a graduation gift; trees to mark the end of the mortgage payments; a special Christmas gift for a friend who enjoys the outdoors; the list is endless ...

We plant combinations of white cedar, white pine, red oak and sugar maple- all strong, long-lived native Canadian species that thrive in our valley landscape. Our trees are grown locally in the Ferguson Forest Centre in Kemptonville. Our trees are tended for three full years after planting until they reach the "free-to-grow" state.

We offer the possibility of planting seedlings which will gradually take their place, without inscription, in a vibrant new forest for the future. Or, you can adopt a mature tree with an inscription, a landmark where the family can visit, relax and enjoy the serenity of a wooded parkland.

Thank you for considering special occasion trees ...
